# QUIZ # 4

Objective:	
	Apply CSS Layout Techniques

Specifications:	
	Obtain the Quiz04 source files (HTML and CSS). You should not need to make any changes to the HTML. You will need to add your own rules to the CSS provided.
	Add CSS rules to create the following page layout and behavior:
	- The page is displayed 900px fixed width and centered in the browser
	- The top of the page, including the header and navigation, should always be visible at the top of the browser, even when the page scrolls
	- The page content section should vertically scroll as needed
	- See screenshots below for an illustration of page behavior, note how the page content scrolls but the heading and navigation do not

NOTE: Submission requirements described on page 2 of this document

Submission:	

	Use a compression utility such as Winzip or Winrar to compress the HTML and your updated CSS into a .zip file. Name the file:
	   lastname_firstname_quiz04.zip
	using your last and first name.
	
	 Upon completion, email the **.zip** file as an attachment to your instructor:
	        To: jeffrey_parker@bcit.ca
	        Subject: comp1950 quiz 4
	        Body: your name
	        Attached: zip file
